Haron Holding AG looking to increase its stake in MainFirst Holding AG – no impact on MainFirst business policy and customer services

Frankfurt am Main, 24 November 2016 Haron Holding AG is planning to increase its stake in MainFirst Holding AG. Accordingly, Haron Holding, which to date holds 44.9 percent of the share capital of MainFirst Holding, has made a purchase offer to the shareholders of MainFirst Holding with the aim of acquiring a further 29 percent of share capital. As with all such transactions, the offer is subject to approval from BaFin within the framework of ownership control procedures.

The management, partners and Board of Directors of MainFirst Holding AG welcome the offer from Haron Holding. Haron has been a shareholder in MainFirst for two years and supports the business model and strategy of MainFirst Group. On the one hand, this is based on the European equity brokerage platform with highest quality research. On the other hand, this implies the successful multi-boutique approach in asset management, in which highly experienced fund management teams pursue the clearly defined implementation of their respective investment styles. An acquisition by Haron of the majority shareholding will have no influence on the business policy and customer services of MainFirst. Haron Holding is a long-term investor and reliable partner for MainFirst.
